INTERNSHIPS

CodeBind Technologies | July 2024 - August 2024

- In this project i involve the design and implementation of a responsive and intuitive website that allow user to easily browse,selectand purchase the product

PROJECTS

Enhancing automated document verification system using hashing techniques | January 2025 - May 2025

- The increasing reliance on digital documents for various official, legal, and personal purposes has led to a growing need for secure and efficient document verification systems. Traditional document verification methods are often manual, time-consuming, and susceptible to manipulation, delays, and fraudulent activities. These limitations pose significant risks, especially in sectors like education, healthcare, finance, and government, where the authenticity of documents is critical. This project aims to enhance the document verification process by leveraging Blockchain Technology, ensuring that documents are tamper-proof, easily verifiable, and securely accessible. By utilizing blockchain's decentralized nature, immutable record-keeping, and transparency features, the proposed system will provide an efficient solution to authenticate documents in real time, thereby reducing fraud and increasing trust in digital document exchanges. The system can also support role-based access control t

ACHIEVEMENTS

- Top 10 in class, Received scholarship in B.Tech/B.E.
- Top 10 in class in school
